

# Achieve & Sustain DISP Compliance

From compliance to continuous security  
maturity

# Who we are

Excelium is a specialised cybersecurity and assurance provider supporting organisations operating in regulated and high-risk environments.

Our focus is simple: Deliver **practical, defensible, and sustainable security outcomes** aligned to Defence expectations.

We combine:

- Governance, Risk & Compliance (GRC)
- Security Engineering
- Operational Cyber Capability

To ensure your DISP posture is not just achieved - but maintained.

# Understanding DISP

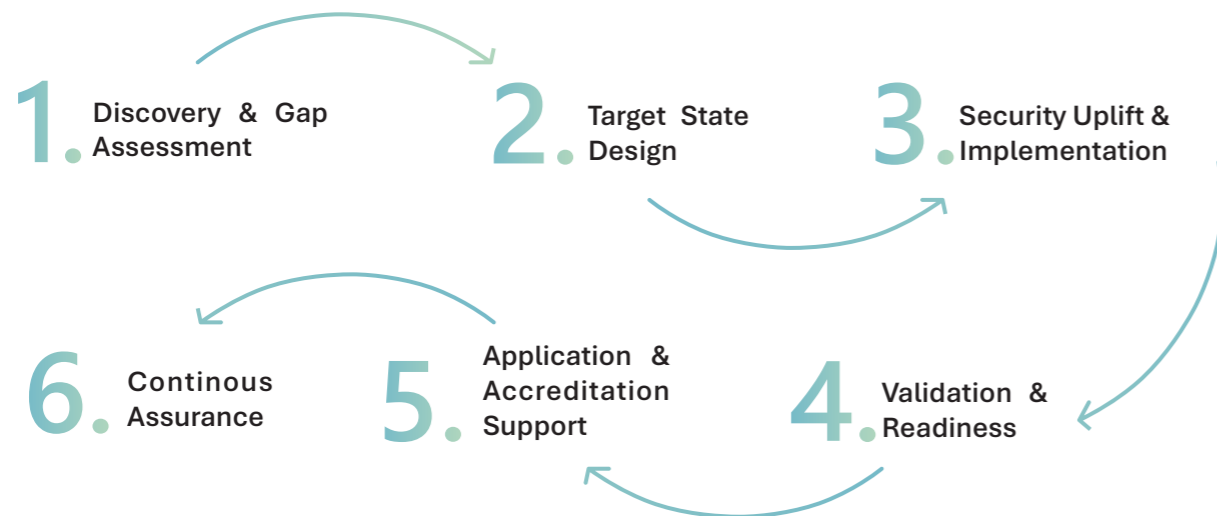

The Defence Industry Security Program (DISP) enables organisations to work with Defence by ensuring appropriate safeguards across key security domains.

We support alignment across:

- Personnel Security
- Information & Cyber Security
- Physical Security
- Security Governance

Excelium is experienced in integrating security into business-as-usual operations for small to medium business. As such, we understand how much security can impact on productivity. This is why our approach integrates these domains into your business operations, and is not treated as standalone compliance activities or simple “box-ticking” exercises.

# Our approach (End-to-end delivery model)

# Key differentiator: Embedded cyber capability

## Security Engineering & Monitoring Services

Unlike traditional advisory-only providers, we deliver **embedded operational capability**.

### Security Officer

- Reduce operational costs while maintaining full compliance with DISP security governance requirements
- Access experienced security professionals delivering training, briefings, and ongoing DISP-aligned guidance
- Receive end-to-end support across DISP lifecycle, including on-boarding and Annual Security Review preparation
- Strengthen security posture through proactive risk management, continuous assessment, and targeted remediation activities
- Enhance governance and assurance with embedded expertise across policy, compliance monitoring, and reporting

### Security Engineers

We provide dedicated engineers to:

- Monitor and remediate configuration drift
- Validate security baselines across cloud, endpoints, and infrastructure
- Implement and tune security controls (E8, ISM aligned)
- Support secure architecture and system hardening

### Security Analysts

Our analysts deliver:

- Continuous monitoring of security posture
- Threat detection and triage support processes
- Vulnerability analysis and prioritisation
- Reporting aligned to executive and compliance requirement

### Why Organisations Choose Us

- **DISP-Focused Expertise**  
Deep understanding of Defence security frameworks and expectations
- **Integrated Delivery Model**  
GRC + Engineering + Operations in one service
- **Practitioner-Led Approach**  
Delivered by experienced security engineers and cleared professionals
- **Sustainable Compliance**  
We build systems that are maintainable, not audit-driven
- **Alignment to Standards**  
ISM, Essential Eight, PSPF, DSPF, ISO 27001, AS4811-2022

# Call to action

**Secure your pathway to DISP — and maintain it.**

Engage with us to:

- Assess your current maturity
- Build a compliant and resilient environment
- Maintain assurance long after accreditation
